The Annual Survey of Industries (ASI) is the principal source of industrial statistics in India. This report presents the provisional summary results for Census Sector of ASI : 1982-83 to meet urgent needs of the planners, policy makers and other users.

From ASI : 1973-74 Summary results are being presented in two volumes. However, from ASI : 1979-80, there have been some changes in the tables of Vol.I. At present, Vol.I contains explanatory notes on scope, coverage, concepts and definitions, description of National Industrial Classification, distribution of important characteristics by employment size, capital size, type of organisation and ownership at All-India level and also a brief analysis of the results. It also contains tables giving principal indicators by states, selected indicators for All-India at 2-digit and 3-digit level industry groups, selected indicators at 2-digit level industry groups for each state and tables on non-responding units.

This volume (Vol.II), like earlier years, contains description of National Industrial Classification and industry-groupwise (at 3-digit level) data for the selected characteristics for each state and Union Territory.
